

Mastering LTE Course

Amman, Jordan

Course Overview

Long Term Evolution (LTE) is the latest generation of mobile broadband technology (4G), this course address the detailed technical aspects of the LTE capabilities and features, network architecture, RF and network design considerations and LTE major standards as per the 3GPP.

Course Content

- LTE 3GPP Standard
- LTE System Description
- LTE Modulation & Multiple Access
- LTE-Protocol Architecture
- Frame Structure and Channels
- Multi Antenna Techniques
- LTE Procedures and Handover
- LTE optimization features and Solutions
- LTE KPIs and Measurements

Targeted Audience

- RF and Telecom Engineers
- Telecommunication Professionals
- Telecom operators considering upgrade to LTE

Special Discount applies for groups and students.
